Education

JNTU College of Engineering Pulivendula

Bachelor of Technology in Civil Engineering

July 2018 – May 2022

Pulivendula, Andhra Pradesh

Relevant Coursework

- Full-Stack Development
- Frontend Development
- Backend Development
- Database Management
- Version Control
- Deployment
- Software Development Lifecycle (SDLC)
- Flexbox
- Git, GitHub

Work Experience

Devlexus Solutions Pvt Ltd

March 2023–Present

Full Stack Developer

- Full Stack Developer with experience in designing and developing responsive web and mobile applications. Proficient in building dynamic user interfaces using Angular and React, and creating robust back-end APIs with Node.js to ensure seamless functionality and performance.

Personal Projects

E-Commerce Website and Mobile Application (Customer and Admin Apps)

February 2024

- **Platforms:** Web, Android, iOS (optimized for phones and tablets)
- **Technologies:** Ionic, Tailwind CSS, TypeScript, Capacitor, Render (API Deployment), Razorpay, Firebase, Google Maps API, Social Login (Google, Facebook, Instagram)
- **Description:** Developed a comprehensive, mobile-responsive e-commerce platform with dedicated customer and admin apps.
 - **Customer App:** Focused on features such as product browsing, cart management, order tracking, user profile updates, and secure online payments.
 - **Admin App:** Enabled administrators to manage categories, Products, orders, and users with role-based access control. Integrated social login (Google, Facebook, Instagram) for easy admin authentication using **passport.js**.
- **Key Features:**
 - **User Interface:** Designed a responsive UI/UX using **Tailwind CSS**, ensuring seamless performance across devices.
 - **API Integration:** Integrated RESTful APIs hosted on **Render** (<https://fl-api.onrender.com>) for dynamic data exchange.
 - **Online Payment Integration:** Integrated **Razorpay** for secure payment processing, offering users a seamless and secure checkout experience.
 - **Location Auto-Complete:** Integrated **Google Maps API** for location auto-completion during address entry, enhancing user experience and reducing errors.
 - **Social Login for Admin:** Implemented **Google, Facebook, and Instagram login** for admin authentication, allowing for quick and secure access to the admin panel.
 - **Cross-Platform Compatibility:** Leveraged **Ionic** and **Capacitor** to deploy the app across Android and iOS platforms.
- **Development Tools:**
 - Ionic CLI, Capacitor, VS Code, Chrome DevTools, Android Studio, Razorpay SDK, Google Maps API, Firebase.

Multilingual JSON Object Generator Using Angular

staging.di3540ht7cw67.amplifyapp.com

September 2024

- **Technologies:** Angular, TypeScript, Google Translate API
- **Description:** Developed a web application using Angular to dynamically generate language-specific JSON objects for i18n (internationalization). The tool processes a user-provided JSON structure, translates its values into a selected language using Google Translate API, and outputs a new JSON object with the same keys but translated values.
- **Key Features:**
 - **Dynamic Language Selection:** Integrated a dropdown for selecting target languages.
 - **API Integration:** Utilized Google Translate API for real-time translations.
- **Impact:**
 - Streamlined the process of generating JSON objects for different languages, reducing manual effort
 - Accelerated the implementation of multilingual features in team projects.
 - Increased team productivity by automating repetitive translation tasks.

Technical Skills

Frontend: Angular, React.js, HTML, CSS, Bootstrap, JavaScript, TypeScript.

Backend: Node.js, NestJs, Express, JavaScript.

Databases: MongoDB, SQLite.

Other Skills: UI Automation, API Testing, Manual Testing

Achievements

- Led a team of 8 members, successfully managing and delivering 5 projects from initiation to completion, ensuring timely delivery and adherence to project objectives.
- Certified in the MEAN Stack (MongoDB, Express.js, Angular, Node.js) with a focus on both frontend and backend development.
